Automatidata Project Proposal

Overview:

TLC is building a regression model that predicts taxi cab fares before each ride based on distance, time of day, and any additional variables found necessary

Milestone	Tasks	Deliverables/Reports	Relevant Stakeholder (Optional Activity)
1	Establish structure for project workflow (PACE)	Global-level project document	
	Plan		
1a	Write a project proposal		
	Plan		
2	Compile summary information about the data	Data files ready for EDA	
	Analyze		
2a	Begin exploring the data		
	Analyze		
3	Write a project proposal	EDA report	
	Plan and Analyze		

Course 1: Foundations of Data Science

3a	Visualization building	Tableau dashboard/visualizations	
	Analyze and Construct		
4	Compute descriptive statistics Analyze	Analysis of testing results between two important variables	
4a	Conduct hypothesis testing Analyze and Construct		
5	Build a regression model Analyze and Construct		
5a	Evaluate the model * Execute *	Determine the success of the model	
6	Communicate final insights with stakeholders Execute	Final model	
6а	Compile summary information about the data Execute	Report to all stakeholders
